General

Test Authorities, Registration Mark, Approvals

Low voltage switchgear from Benedict GmbH is built and tested to national and international specifications. All devices suit all important specifications without any test obligation, like VDE, BS and also relative to IEC Recommendations and to European Standards like IEC 947 and EN 60947.
It is for this reason of our Low voltage switchgear is used all over the world. In order to provide special versions, limitations to the max. voltages, currents and power ratings or special markings are sometimes necessary.

Quality Control System

Since November 1991 Benedict GmbH has been certified according to the quality control system **ÖNORM EN ISO 29001**. The target of the ISO-certification is, to grant the customer the quality of the performance of his supplier, who is audited in accordance with this standard.

CE-Marking CE

The manufacturer has to sign his products with the CE-Marking. With the CE-Marking the manufacturer confirms the accordance with the different EEC Directives. The CE-Marking is absolutely necessary to sell the products in the EEC.
Below you find the EEC Directives concerning our products.
Low Voltage Directive 2006/95/EC
EMC Directive 2004/108/EC
RoHS + WEEE 2002/95/EC + "002/96/EC

Explanations for choice and supply of low voltage switchgear in Canada and USA

Marking of auxiliary contacts
At several devices in UL-data are two voltages for auxiliary contacts mentioned (e. g.: 600 volts at same potential, 150 volts at different potentials). That means, if the voltage is higher than 150 volts, the control voltage applied to input terminals must be at the same potential.

Low voltage switchgear for auxiliary circuits (e. g. contactor relays, control units, auxiliary contacts in general) usually approved for "Heavy Duty" or "Standard Duty" UL and besides these marked with the admissible max. voltage or with short codes (see table).

Marking of auxiliary contacts according to CSA and UL	Max. rated values per pole Voltage V	Current Make A	Break A	Cont. Current A	Contact Rating Code Designation
Heavy Duty (HD or HVY DTY)	AC 120 AC 240 AC 480 AC 600	60 30 15 12	6 3 1,5 1,2	10 10 10 10	A150 A300 A600 A600

Technical Information

Degree of protection acc. to IEC 60947-1

Protection ratings are prefixed by the internationally agreed letters IP followed by two digits.

1 st digit: Pertains to solid objects
2 nd digit: Pertains to water.

1 st digit	Short description	Definition
1 body	Protected against solid objects greater than 50 mm	Excludes solid objects exceeding 50 mm in diameter and protects against contact with live and moving parts by a large surface such as a hand (but not against deliberate access).
2L	Protected against solid objects greater than 12,5 mm and against contact by standard test finger	Excludes solid objects exceeding 12,5 mm in diameter and protects against contact with live and moving parts by a standard test finger or similar objects not exceeding 80 mm in length.
3	Protected against solid objects	Excludes solid objects exceeding 2,5 mm in diameter or thickness. greater than 2,5mm
4	Protected against solid objects greater than 1 mm	Excludes solid objects exceeding 1 mm in diameter or thickness.
5	Dust protected	Prevents ingress of dust in quantities and locations that would interfere with the intended operation of the equipment.
6	Dust tight	Prevents ingress of dust.

2 nd digit	Short description	Definition
1	Protected against dripping water	Dripping water (vertically falling drops) shall have no harmful effect.
2	Protected against dripping water when tilted up to 15°	Vertically dripping water shall have no harmful effect when the enclosure is tilted at any angle up to 15° from its normal position.
3	Protected against spraying water	Water falling as a spray at an angle up to 60° from the vertical shall have no harmful effect.
4	Protected against splashing water	Water splashed against the enclosure from any direction shall have no harmful effect.
5	Protected against water jets	Water protected by a nozzle against the enclosure from any direction shall have no harmful effect.
6	Protected against heavy seas	Water from heavy seas or water projected in powerful jets shall not enter the enclosure in harmful quanties.
7	Protected against the effects of immersion	Ingress of water in a harmful quantity shall not be possible when the enclosure is immersed in water under standard conditions of pressure and time.
8	Protected against submersion	No ingress of water.

Resistance to climatic conditions acc. to IEC60068

Open-type devices are climate-resistant in the constant climate according to IEC60068-2-3 (this is a climate with an ambient temperature of 40°C and an atmospheric humidity of 90 to 95%).
Enclosed devices are climate-resistant in an alternating climate according to IEC 68-2-30 (this is a moist alternating climate with a 24-hour cycle between climates with an ambient temperature of 25°C, and an atmospheric humidity of 95 to 100% and an ambient temperature of 40°C, and an atmospheric humidity of 90 to 96% in the presence of condensation during rises in temperature).
Data are valid up to an altitude of 2000m above sea level.

Short circuit protection

Back up fuses should be used to protect contactors and starters against short circuits. For starters the device with the smaller admissible fuse at the main and at the control circuit (contactor or thermal overload) determines the fuse size.
After a short circuit devices have to be checked for correct operation.
Disconnect power before proceeding with any work on the equipment!

Mounting positions

No limitations, all kind of postitions allowed.

Suitable ambient temperatures:

Operation	open °C	-40 up to +60
	enclosed °C	-40 up to +40
Storage	°C	-50 up to +90

Cam Switches 10 - 250A

Cam switches can be used for virtually all purposes, e.g. as motor, main, control or instrument switches. Over and above the switching programs mentioned in the list, an effectively limitless number of special programs can be implemented.

Load switch L.. 125 - 1200A

Load switches are primarily employed where resistive or slightly inductive current loads are to be switched on and off, or switching takes place without loading.
Load switches are assembled by parallel switching of two or more of cam switch contacts.
With customer built main terminal protection, load switch L.. can also be used as main switch.

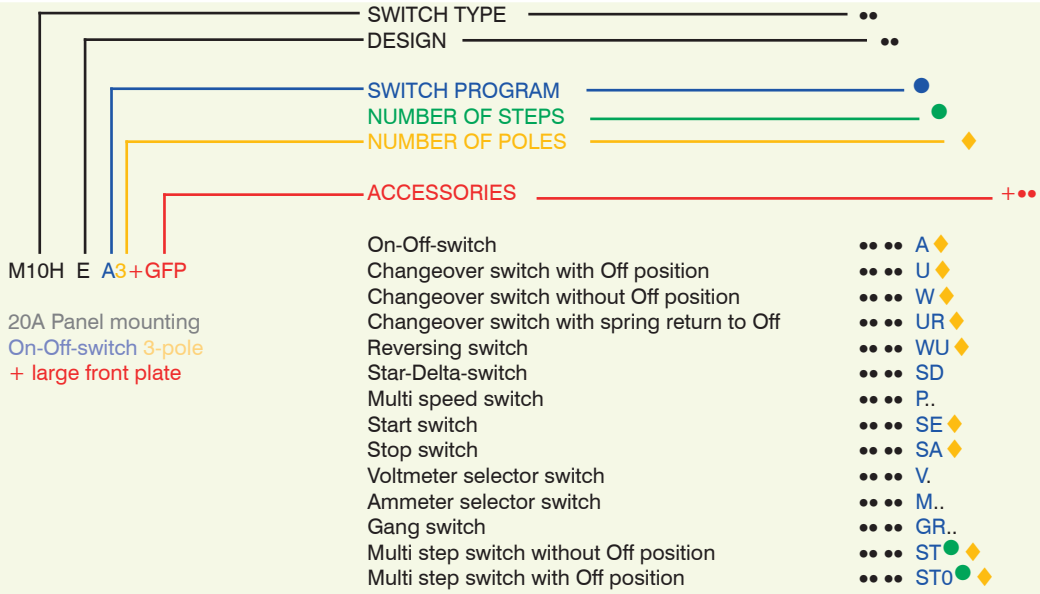
Ordering



Panel mounting designs

Switches of the panel mounting designs listed below have protection from front IP40. Where a shaft seal (appendix +WD) is used, the protection is increased to IP54. Use of a moisture proofing cap (appendix +FR) results in an increase in rear protection to IP54. In the standard version, the switches are delivered with a square escutcheon plate and black instrument knob. Forward mounting is possible for some of the design E switches. The position of the terminals of the standard switches is left and right, at switch M10H the terminals are above and below. Where a knob insert is turned by 90° (can easily be performed after delivery), the position of the terminals can be changed.
Dimensions see page 262.

1) Switches are delivered with switch type M10
2) For switch types N33F only, max. 3 poles and 3 cells

Base mounting designs

Switches of the designs listed below have protection from front IP40. When a shaft seal (appendix +WD) is used, the front protection type is increased to IP54. In the standard version, the switches are delivered with a square escutcheon plate and black instrument knob (design SMA with grey cover and grey toggle knob). Door couplings are advisable for switchgear cabinets with hinged doors.

The position of the terminals of the standard switches is left and right, at switch M10H the terminals are above and below. Where a knob insert is turned by 90° (can easily be performed after delivery), the position of the terminals can be changed.
Dimensions see page 263.

Design		Possible switch sizes					
Description	**Type appendix**	M10H	M20	N20 N33F	N40 N61 N80	N100 N200	L...
 **Base mounting** For screw mounting to the back wall or floor of distributor boxes, or of appliances with removable lids. Plastic enclosed switches

The switches, which have durable plastic enclosures, are intended for wall mounting or attachment to machines. In the standard version, they are supplied with a light-grey enclosure, square escutcheon plate, black markings on a silver background, and a black instrument knob. Other colours and colour combinations are available for most enclosure types. It is not possible to mount an additional rectangular plate. The enclosure base is equipped with 4 entry glands with heavy-gauge conduit threads (see drawings). In all types of plastic enclosures, two terminals that are connected and insulated from switch column can be provided for a PE conductor (appendix +PE). In addition, 1 or 2 pilot lamps (appendix +SL..) with neon lights can be installed.
Dimensions see page 264.

Cast aluminium enclosed switches

The switches with cast aluminium enclosures are intended for wall mounting or attachment to machines, under heavy-duty operating conditions. The switches are delivered with a square escutcheon plate, black markings on a silver background, and a black instrument knob. It is not possible to mount an additional rectangular plate. The enclosure base makes provision for 2 (4) entry glands with heavy-gauge conduit threads. If a switch with an aluminium enclosure is to be mounted directly on the terminal box of a motor, a 35mm or 50mm hole can be made in the floor of the switch enclosure. Design PLF is the replacement for designs G and GF at types N40 to N80.
Dimensions see page 265.

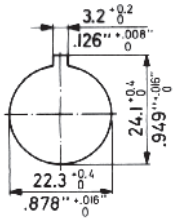
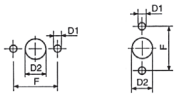
Central fixing 22mm



Mounting holes

D366-f



Single hole mountings are generally delivered for a 16mm (.64") mounting.
Using the forwarded adapter ring, it is possible to alter the single hole mountings from 22mm (.88"). For that purpose the adapter ring has to be attatched onto the threded part of the body in such a manner, that
1. the flat side of the adapter ring shows towards the front seal and
2. the inner nose fits into the notch of the body.
The adapter ring has to be pushed towards the front seal.

Operating Knobs and Handles

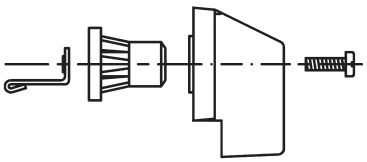
Types of handles

In the standard version, the switches are supplied with a black twist knob or instrument knob (M10H - N33F), except for design SMA, which has a grey toggle knob. Switches of size L, which consist of 2 or 3 switch columns, come with a black hand wheel. If required, the switch can be supplied with other knobs, which can later easily be exchanged. All operating knobs have an insert, which sets the position of the knob in relation to the switch shaft. This insert can be mounted in 8 different positions (at intervals of 45°), causing the angle of each individual switch setting to be rotated by 45°.

All operating knobs can be moved on the hexagonal shaft, to permit adaptation to different sheet thicknesses, etc.

Type		M10 M10H M20	N20 N33F	N40 N61 N80 L100 L160	N100 N200 L400 L600 L800 L1200
Knob movement	mm	5	5	7	9
Hexagonal shaft dimension	mm	5	7	9	12

In the standard version, the switch terminals are positioned left and right (except M10H). When the knob insert is turned by 90°, the lay-out of the terminals changes to top and bottom.



Ordering example: Cam switch N61 V U3 with Instrument knob red
Order type: **N61 V U3 +G3**
Dimensions see page 267

Escutcheon Plates

TELUX-Cam Switches in designs E, V, P, PF, SM, UP, Z and KE are supplied with a square escutcheon plate consisting of a black frame and plexi insert plate. The markings are printed in black are on the back of the insert plate. To protect the markings so that they remain easy to read, the back of the insert plate is lined with silver foil. In addition, rectangular plates can be provided for all switch sizes, which can fitted on all switches after mounting.

Square plate

Rectangular plate
(with square plate)
Slot on the cover plate
upper side

Preferred position of the slot on bottom of the cover plate

Slot for additional plate

TELUX-Cam Switches in design SMA, for distribution boards with 45mm inside edge of installation cover, is supplied with a grey cover and black markings.

Special engraved markings on escutcheon plates are limited by the available space. In the case of relatively large production runs or frequent use of the text, we recommend ordering of a printing block. This will be invoiced at cost price, and the engraving will not be charged for. This investment generally pays with batches from 50 pieces upwards.
The "escutcheon plate" column of the selection and ordering tables for switch programs indicates the standard plate and, in some cases, an additional plate that is often used for the programs in question. If such a plate, listed in the selection table, is desired, the appropriate code number should be stated when ordering a switch and switch program.

Should only **plates** or **parts** of the latter be ordered, the order type is assembled as shown by the following example.

Code letter of switch sizes

M10, M10H, M20	**A**
N20, N33F	**E**
N40, N61, N80, L100, L160	**H**
N100, N200, L400, L600, L800, L1200	**L**

Ordering example: Escutcheon plate silver, complete, for cam switch M10, marked with MAN OFF AUTO, angle of rotation 60°

Order type:

A85009

Switch size	**Plate**	**Marking**
Code letter for M10, M10H and M20	Art.No. for standard plate with markings, complete	Code number with label MAN OFF AUTO angle of rot. 60°

However, if a **switch** with non-standard lettering is required, only three-digit code number for the marking need be added to the order type (see next page).

Dimensions see page 267

Switching angles

Arrangement of switch settings

All feasible arrangements of switch settings are shown, and defined by position numbers, in the following tables. Not only the switching angles, but also switches with latched or momentary settings, or combinations of the two, are distinguished from one another.
Knowledge of the following variations is particularly important when planning special switches. It is necessary to state the position number when ordering special switches, as the cheapest version will otherwise be selected.
All the switches types listed can be supplied with switching angles other than those indicated, provided that they are permitted by the switch program (additional charge).

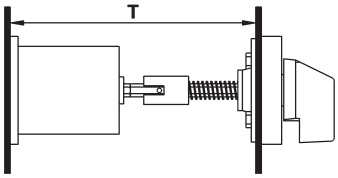
Door couplings

For switches with door couplings it is necessary to state the installation depth - that is, the distance between mounting level of the switch and the inside edge of the door (dimension T).



Door couplings are available for switches to be installed in switchgear cabinets or distribution boards with hinged doors. These permit the doors to be openened without removal of the operating knobs.

Ordering example: Cam switch N100 V A3 with lockable door coupling, moisture protected IP65, dimension T=580mm
Order type: **N100 V A3 +TK2FR/580**

Dimensions see page 269

	Ordering Code	Suitable for designs	Suitable for switch type

Door coupling locked Protection class from front: IP54 5-hole mounting Doors only open at a given switch setting: unless otherwise stated, the "OFF" setting.	**+TK2FR/...**	V	N40, N61, N80, N100, N200 L100, L160, L400, L600 L800

Lockable switches

Key-operated and lockable switches are supplied with two keys. Additional keys or other types of lock on request.

Ordering example: Cam switch N20 E A3 key operated
Order type: **N20 E A3 +SA**

Dimensions see page 270 and 271

	Ordering Code	Suitable for designs	Suitable for switch type
 **Key operated switch** Lock Willenhal FT101, key removable in all lockable settings. Other types of lock on request. Maximum number of cells M10 - N33F: 6 N40, N61: 2 **Key operated switch,** key removable only in some settings. Add letter ofsetting where key is removable to ordering code according to the scetch belove. 	**+SA** **+SA/.**	E, V, SM E, V P SMA UP	M10H, M20, N20, N33F N40, N61 M10, N20, N33F, N40, N60 M10H, M20 M10
 **Key operated switch IP65** Lock Ronis R455, key removable in all lockable settings. **Key operated switch,** key removable only in some settings. Add letter of setting where key is removable to ordering code according to the scetch above.	**+SA** **+SA/.**	Z, ZO	M10H, M20
 **Key operated switch** Lock KABA8, key removable in all lockable settings. **Key operated switch,** key removable only in some settings. Add letter of setting where key is removable to ordering code according the scetch belove. 	**+SAK** **+SAK/.**	E	M10H, M20
 **Key operated switch with barrel for special security functions** Lock EVVA EHZ50/5 Nickel matt Special version which prevents not only switching but also access to the cable ends and removal of the switch when locked. Maximum number of cells Design E, P: 4 Design UP : 3	**+SASI**	E P UP	M10H, M20 M10, M20 M10, M20
Key operated switch for special security functions without lock for use of lock EVVA EHZ50/5 or with same dimensions Maximum number of cells Design E, P: 4 Design UP : 3	**+SASO**	E P UP	M10H, M20 M10, M20 M10, M20

Padlock devices

A range of padlock devices designed to prevent from being turned on by unauthorized personnel, or during maintenance and repair work, can be supplied.
Dimensions see page 272

Ordering example: Cam switch N33F E A3 with interlocking device SV3 suitable for 3 padlocks
Order type: **N33F E A3 +SV3**

	Padlock device Description	**Ordering Code**	Suitable for designs	Suitable for switch type
	**Padlock device** Standard version **black**, otherwise **red**, for 1 or 2 padlocks. Shackles up to Ø6mm Standard version **black** 64 x 64mm, otherwise **red** 64 x 64mm	**+SV1** **+SV1R** **+SV164** **+SV164R**	E, V, SM P, PF E, V P, PF	M10H, M20 M10 M10H, N20, N33F N20, N33F
	**Padlock device** Standard version **black**, otherwise **yellow** insert plate and **red** twist knob for 1-3 padlocks. Shackles up to Ø8,5mm Prior to insertion of the first padlock, a red locking ledge must be depressed. This indicates that the switch is locked.	**+SV3** **+SV3R** E, V	E, V E, V L800, L1200 PF	N40, N61, N80, L100, L160 N100, N200, L400, L600, N40, N61, N80, N100, N200
	**Padlock device** Standard base **grey**, locking ring **black**, or with **yellow** base and **red** locking ring. Locking ring for 1-3 padlocks. Shackles up to Ø6mm Standard base **grey**, locking ring **black** 88 x 88mm, or with **yellow** base and **red** locking ring 88 x 88mm	**+SV4** **+SV4R** **+SV488** **+SV488R**	E, V SM P, PF E, V E, V P, PF	M10H, N20, N33F M10H, N20, N33F N20, N33F N20, N33F N40, N61, N80 N40, N61, N80
	**Key lock device** With a cylinder lock in the lock attachment, one or more switch settings are lockable (state when ordering). The operating knob can only be turned when unlocked. The key can be withdrawn wheter locked or unlocked. Special versions, in which the key cannot be withdrawn when in some (unlockable) settings can be supplied.	**+SZ**	E, V SM	alle M10H, M20, N20, N33F
	Key lock device Special version for on-off switches, in which it is possible to switch off without a key.	**+SZ2**	E, V SM	alle M10H, M20, N20, N33F

Switch interlocks

A wide range of locks and interlocking devices, designed to prevent accidental or hazardous switching, can be supplied.

Ordering example: Cam switch N20 E A3 with push button switch lock
Order type: **N20 E A3 +DV**

Dimensions see page 273

	Description	Ordering Code	Suitable for designs	Suitable for switch type
	**Push button interlock** The switch can only be actuated when the pushbutton is simultaneously depressed (two-handed operation).	**+DV**	E, V	all
	Interlock with electrical contact The switch can only be actuated when the pushbutton, which also operates a make and break contact, is actuated (for external interlocking devices or safety measures).	**+ET**	E, V	all
	**Magnetic interlock** The switch can only be actuated when an electromagnet is simultaneously excited. When ordering, voltage and percentage duty cycle of the magnet coll should be stated.	**+MV**	E	N20, N33F, N40, N61, N80 N100, N200
	**Circular switch** Switches that have the maximum number of settings for a given switching angle can be made without a stop position, permitting direct switching from the last to the first setting.	**+RU**	all	all
	**Backswitch 1** Special version of the circular switch, in which the switch can only be turned in one direction.	**+RS1**	all	all
	**Backswitch 2** Special version of the circular switch, in which, in given positions, the switch can only be operated in one direction.	**+RS2**	all	all

Couplings and stop mechanism

A range of couplings and stop mechanisms for trouble-free operation of switches with a very large number of contacts can be supplied.
Dimension see page 274

Ordering example: Cam switch N200 V ST0113 spread over three columns interconnected by gears
Order type: **N200 V ST0113 +ZK3**

Description	Ordering Code	Suitable for designs	Suitable for switch type
Coupling of two columns For simultaneous drive of two switch columns (with very large number of switch cells or limited installation depth).	**+ZK2**	E, V	all
Coupling of three columns For simultaneous drive of three switch columns.	**+ZK3**	E, V	all
Coupling of different switch sizes For attachment of control switches (auxiliary contacts) to larger switches. M10H, M20 in sizes E and H. N20 to N80 in size L.	**+ZWK**	E L800, L1200	N40, N61, N80, L100, L160 N100, N200, L400, L600,
Delayed action switch Using a delayed action coupling, two switch shafts - a main shaft and delayed shaft - can be coupled, such that the delayed shaft is rotated together with the main shaft once a given angle of rotation is reached (e.g. for off-load return of switches used with pole-changing motors).	**+SK**	E, V G, GF	N20, N33F, N40, N61, N80 N20
Second stop mechanism With switches in which a large number of contacts is simultaneously operated, use of a second stop mechanism is sometimes necessary, in order to ensure precise switching to the next setting.	**+RW2**	all	all
Metal stop mechanism for extreme mecanical stress on the stop mechanism, e.g. where many contacts are switched at the same time. Not for PN110 to PN123	**+MRW** E, V	E, V E, V L800, L1200 G, GF	N40, N61, N80, L100, L160 N100, N200, L400, L600, N20

Special versions

A number of special versions can be supplied for adaptation of switches to various conditions of use.

Ordering example: Cam switch M10H E U3 with large front plate
Order type: **M10H E U3 +GFP**

Description	Ordering Code	Suitable for designs	Suitable for switch type
Switch shaft sealing For increased front protection class on IP54.	**+WD**	E, V SM	N20 to L1200 N20, N33F
Front plate/switch shaft sealing For increased front protection class on IP65. In this version, a wider hole is required for the shaft. Dimensions see page 272	**+FPWD**	E, V, SM	N20, N33F
Extended switch shaft For adaptation of switch designs V and SM to the enclosure depth. State additional shaft length when ordering.	**+VW/...**	E, V SM	all M10H, M20, N20, N33F
Large front plate Switch with front plate and operating knob of the next size (for replacement of older, larger switches or aesthetic reasons).	**+GFP**	E, V, SM	M10H, N20, N33F
Switch with pilot lamp lamp red, 230V lamp red, 400V lamp green, 230V lamp green, 400V	**+SLR/230** **+SLR/400** **+SLG/230** **+SLG/400**	E P UP	all M10, N20, N33F, N40, N61 M10, N20
Gold plated contacts For electronic circuits with low voltages and currents.	**+GK**	all	M10H, M20, N20, N33F
Tropical proof type	**+TR**	all	all
Neon safety switch For all-pole switching off of neon advertisement circuits by the Fire Brigade. Dimensions see page 274	**+FEU**	E	N20, N33F

Accessories

A number of special versions can be supplied for adaptation of switches to various conditions of use.
Dimensions see page 273

Ordering example: Cam switch N20 E A3 with terminal cover plate
Order type: **N20 E A3 +KLAD**

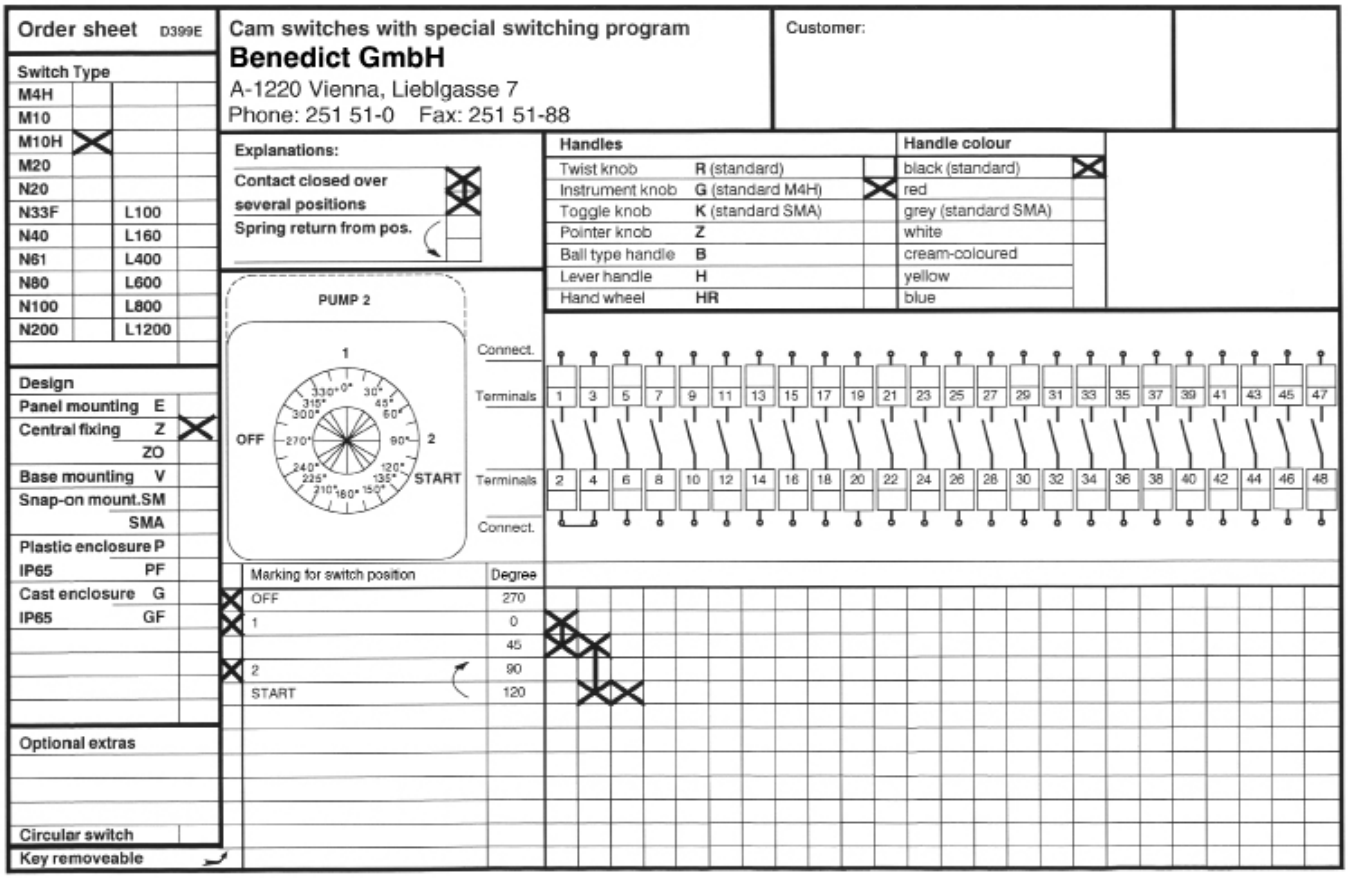
Description	**Ordering Code**	Suitable for designs	Suitable for switch type
Terminal cover plate Prevents accidental touching of live terminals (requirement for main switches according to VDE 0113) only for 2 cells for all cells	**+KLAD** **+KLAD**	E, V E, V	N20, N40, N61, N80 N100, N200 N33F
Moisture proofing caps Protection class from rear: IP54. For protection of the switch from dust and moisture (e.g. when installed in machine pedestals). For switch mounting from the front and rear. Conical cable entry glands. Maximum number of cells: M10H 7 N20 5 N40 4 N61 2	**+FR**	E	M10H, N20, N40, N61
 **Angled terminals** For easy connection of inaccessible switches. Unless otherwise stated, all terminals specified with markings are equipped in this manner. A distinction is drawn between left and right angled terminals. Seen from the switch end, the left terminals are located above left and below right; conversely, right terminals are above right and below left.	**+WK**	E,V N100	M20, N20, N40, N61, N80,
 **Fast-on connectors** For 6,3 x 0,8mm plugs.	**+AMPZ**	E, V	M20, N20
Earth terminals 2 terminals, connected with one another, insulated from switch column: for earth conductors.	**+PE**	E, V, P, PF PF G, GF	all M10, N20, N33F, N40, N61 N80, N100, N200 N20
Additional rectangular escutcheon plate 1 line Dimensions see page 267	**SRE**	E, Z, V, SM	all
Big additional rectangular escutcheon plate for 2 lines Dimensions see page 267	**SRE2**	E, V	M10H, M20, N20, N33F
Spare key for key operated switches with Lock Willenhal FT101	**J7101**	E, V, P SMA	M10H, M20, N20, N33F,N40 M10H, M20
Spare key for key operated switches with Lock Ronis R455	**B4-R455**	Z, ZO	M10H, M20
Wrench for switches with central fixing	**J7049**	Z, ZO	M10H, M20

Switching Programs according to Customer Requirements

As a result of their modular construction, TELUX cam switches are particularly suitable for manufacturing of special variants. According to its function, each pair of contacts in the switch is adapted to the desired program by appropriate design of the cam plate. In the case of switches with an overall switching angle of more than 180°, provision must made for a cam plate in each switching cell, controlling two opposite, independent contact pairs with matching programs (does not apply to M10, M10H, M20 and N20).
Depending on the desired contact program for the special switch, it may often be impossible to make full use of all switching cells, that is, to include the maximum possible number of contacts. In determining the number of cells or switch length, one-contact cells will sometimes be resorted to.
Switch sizes M10, M10H, M20 and N20 are exceptions to this rule. Here, two cam plates can be built into each cell, so that both contacts are independently controlled (full use of the cells with special programs).

In all special switches with overall switching angles of less than 180°, the number of cells required is calculated by having the total number of contacts in the switching program.
When planning for switches with special programs, choice of the optimum switching angle thus plays an important part. The listing of all the options for lay-out of switch settings, on pages 247 and 248, should be an aid to planning (position numbers PN).
If special markings are to be engraved on the escutcheon plates, it is vital to take account of the available space. It is advisable to use abbreviations.
We provide forms (see page 275) on request, free of charge, to give a clear overview when special programs are being defined. Switch size, design, type of operating knob and desired switching angle, as well as the function of the contacts, are entered on these forms. Provision has also been made in them for entry of details as to escutcheon plate engravings or other special requirements.

Ordering Example



Order sheet A4 see page 275

Utilization Categories

For easier choice of devices and in order to make the comparison of different products simplier are utilization categories for cam switchesaccording to IEC 947-3, VDE 0660 Part 107 and auiliary contactsaccording to IEC 947-5-1 and VDE 0660 Part 200 determind. The Table below offers divers utilization catagories and assorted test conditions.

Kind of current	Category fre-quent oper-ation	Category infre-quent oper-ation	Typical applications	Rated operational current	Test conditions for the number of on-load operating cycles (normal service) Make I/Ie	Make U/Ue	Make cosφ	Break Ic/Ie	Break Ur/Ue	Break cosφ	Test conditions for making and breaking capacities (operation in fault case) Make I/Ie	Make U/Ue	Make cosφ	Break Ic/Ie	Break Ur/Ue	Break cosφ

	DC3		Shunt-motors: Starting, plugging, inching	all values	2,5	1	2	2,5	1	2	4	1,05	2,5	4	1,05	2,5
	DC5		Series-motors: Starting, plugging, inching	all values	2,5	1	7,5	2,5	1	7,5	4	1,05	15	4	1,05	15

U_e Rated operational voltage, U Voltage before make, U_r Recovery voltage, I_e Rated operational current, I Current made, I_c Current broken
1) Time in milliseconds (ms)

Note:
By plugging, is understood stopping or reversing the motor rapidly by reversing motor primary connections while the motor is running.

By inching (jogging), is understood energizing a motor once or repeatly for short periods to obtain small movements of the driven mechanism.

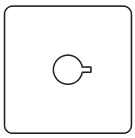
N100, N200, L400, L600, L800, L1200	132	31	9

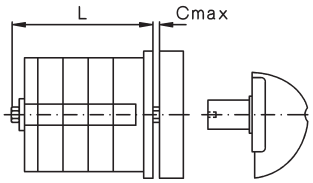
Special drives

Removable knob drive STGR, STGR2
M10H - N33F

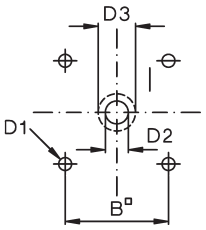
Type	B	C	D1	D2	D3
M10H, M20	36	5	5	12	18
N20, N33F	48	5	5	12	18

Replace dimension D2 with dimension D3 for STGR2
Dimension L see page 262





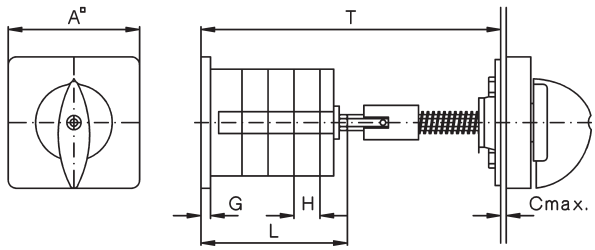
Mounting holes



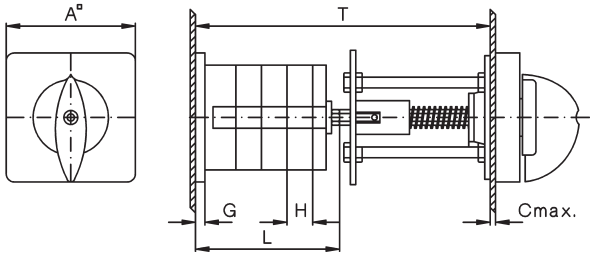
Door couplings

Dimension T is a minimum value. In case of order the dimension T is necessary.

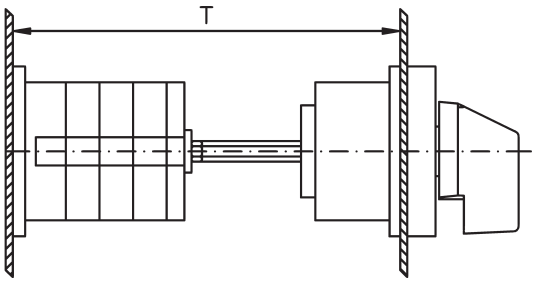
Door coupling TK, TKFR
N40 - L1200



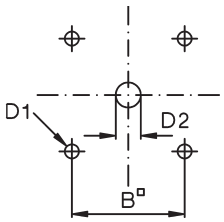
Door coupling, lockable TK2, TK2FR
N40 - L1200



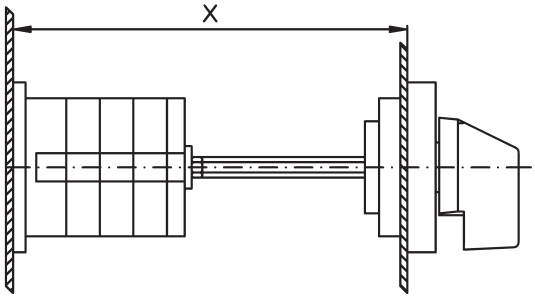
Door coupling TKE, TK2E
M10H, M20, N20, N33F



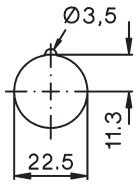
Mounting holes:
TK, TKFR, TK2, TK2FR
TKE, TK2E



Door coupling, lockable TK2Z
M10H, M20, N20, N33F



Mounting holes:
TKZ



Further dimensions see pages 262 and 263.
Dimension T is a minimum value dependent on switch Type and number of cells. For ordering dimension T is necessary

						Minimum dimension T with .. cells
